

INSTRUCTION SHEET

TracStar® 500 Series II High Pressure Kit

AT5030901

Kit required on the manifold block equipped TracStar 500 Series II when fusion pressure plus drag pressure will exceed 1500 psi.

Kit contains:

QTY.	PART NO.	DESCRIPTION
1	MEE00048	3000 PSI PRESSURE GAUGE
1	MEG00027	100 – 3000 PSI PRESSURE REDUCING VALVE

NOTE: Before installing kit, verify system pressure to be no more than 2300 psi. The system pressure should never be set above 2300 psi!

1. Remove 1500 psi pressure gauge from carriage manifold and replace with 3000 psi gauge provided in kit.
2. Remove fusion mode pressure reducing valve from carriage manifold and replace with valve supplied in kit. (Recommended installation torque is 30 – 35 ft*lb)
